

Jaupi Enrico

jaupi.enrico@gmail.com | +39 351 805 5070
github.com/jaupi-enrico | Brescia, Italy | 16 July 2008

Skills

Programming languages: C/C++, Java, Python, JavaScript, SQL (PostgreSQL, SQLite), VBA, Assembly

Frontend & Web: React, Astro, Bootstrap

Backend: Node.js, Express, Flask, REST API, Socket.IO

Tools & DevOps: Docker, Git, GitHub, Vercel

Others: JavaFX, Packet Tracer, Microsoft Office

Languages: Italian (Native), English (Advanced/C1), Spanish (Elementary/A2)

Work Experience

Backend lead | LA SANTI Gomme srl | Mar 2026

- Architected and built the entire backend of the company website from scratch, designing RESTful APIs and server-side logic with Node.js and Express.
- Configured deployment pipeline on Vercel with production-ready SEO optimisations and a strict Content Security Policy (CSP).
- Delivered a performant, maintainable codebase across the full stack: Node.js, JavaScript, HTML, CSS.

Solo Software Developer (Freelance) | Italfood srl | Aug 2024 - Aug 2025

- Designed and developed the company's entire internal worker's scheduling system in VBA/Excel, reducing manual work and eliminating recurring operational errors.
- Served as the sole technical point of contact, gathering requirements directly from the client and iterating on the solution to meet evolving business needs.

Education

ITIS Castelli | Sep 2022 - Jun 2027 | Technical High School Diploma in Computer Science | GPA: 8.36/10 | Core curriculum: Object-Oriented Programming, Data Structures & Algorithms, Databases, Operating Systems, Computer Networks, Discrete Mathematics.

Project Work

- **Enigma M3 Simulator | Apr 2026 :** Implemented a historically accurate desktop simulation of the Enigma M3 cipher machine, including rotor wirings, notch logic, the double-stepping anomaly, and ring settings, with a full JavaFX GUI.
- **Arduino Temperature Monitor & Dashboard | Dec 2025 :** Built a dual-sensor DHT11 monitoring system with LCD display, IR remote, and buzzer. Developed a companion Python dashboard (DearPyGui) showing live charts, rolling statistics, and trend analysis via serial CSV logging.
- **Casa Domotica | Dec 2025 :** Developed a desktop GUI application simulating a smart-home lighting control system.

Awards, Certificates and Competitions

- **Italian Olympiad in Informatics (OII):** Ranked among the top **0.2%** of participants **nationwide**, qualifying for and competing in the National Individual Finals.
- **Italian Team Olympiad in Informatics (OIS):** Competed as a member of the school's team in the national programming competition.
- **Italian Mathematics Olympiad & Disfida Matematica:** Selected to represent the school in regional and national-level mathematics competitions.
- **Harvard CS50x:** Successfully completed Harvard University's CS50x course, earning the official certificate of completion.
- **PoliCollege (Politecnico di Milano):** Successfully completed the **PoliCollege** enrichment program, an advanced university-level course organized by Politecnico di Milano.

Competences

- Excellent time management and ability to deliver projects under tight deadlines
- Strong problem-solving and debugging skills across multiple languages and environments
- Ability to design software architectures from scratch and reason about scalability and maintainability
- Experience working as the sole technical reference, translating business requirements into working software
- Comfortable with low-level reasoning (memory, data structures, algorithms, system logic)
- Rapid learner, able to pick up new technologies and tools independently
- Clear communication with non-technical stakeholders and iterative requirement gathering
- Experience building both GUI applications and backend services end-to-end
- Strong teamwork and collaboration skills in both technical and cross-functional environments

Personal Profile

Motivated Computer Science student with a strong foundation in software engineering and full-stack development. Proven experience in architecting backend systems, automating operational workflows, and managing the full project lifecycle. Passionate about systems programming and scalable architecture. Seeking to leverage technical expertise in a challenging environment while contributing to robust, high-performance software solutions. Committed to professional excellence in international engineering contexts.
